

Recent Research

11/16/2022 - 11/22/2022

This list of “recent research” should serve as a current awareness tool—informing those in our field of the research that the media is highlighting at the moment. Individual studies should always be placed in the larger context of the body of research on a particular topic. The list is broken up into "research" (studies appearing in peer-reviewed, scholarly journals) and "other items" (government reports, new statistics, unpublished research, etc.). Each entry includes a link to the study itself as well as a link to a general news story or press release covering the study (if available). Items are ordered in a naturally progressing manner—those pertaining to pregnancy, then birth, then newborns, etc.

RESEARCH

[“Did You Call Me?” 5-Month-Old Infants Own Name Guides Their Attention](#)
