ZERO TO THREE Competencies for Prenatal to Age 5 Professionals: *Understanding the P-5 Competency Domains*

The P-5 Competencies are organized by eight domains of professional practice. Each domain defines core knowledge, skills, and attitudes necessary for professionals in all disciplines working with young children and their families. Each of the P-5 Competency domains are equally important, and they build upon and reinforce one another. All of ZERO TO THREE's professional development are categorized by the P-5 Competency domains. Each article in the Journal includes a box at the bottom of the first page that identifies the P-5 Competency domains most strongly supported by the article. More information about the P-5 Competencies is available online at www.zerotothree.org/p-5.

P-5 Competency Domains
